

The mission and main subject of the company's activity is production in the field of precision turned parts and components for the automotive industry and household appliances. Management strives for continuous improvement of its quality and environmental management system through the use of tools such as quality and environment policy, quality objectives, audit results, data analysis, corrective and preventive action and management review. Continuous improvement and introduction of new methods to improve QMS and EMS in accordance with IATF 16949:2016 and ISO 14001:2015 standards.

- We want to fulfil customers' needs as best as possible; satisfied customers are important to us.
- Continually improve processes, procedures and quality to reduce costs and resources.
- Avoid environmental burden and energy waste through constant improvement.
- By training workers to create awareness about quality, environment and resources.
- Reduce costs.
- Eliminate risks in the area of systems, processes, products and the environment.
- We undertake to continuously improve the quality management system with the aim of improving quality indicators.
- We undertake to continuously improve the environmental management system with the aim of improving environmental behaviour, especially in the field of environmental protection, including prevention of pollution by reducing emissions, generation of waste, energy, and water consumption.
- Treat resources sparingly.
- We undertake to comply with all legislative and other relevant requirements on environmental protection.
- The management of the company undertakes to create the necessary resources to improve QMS and EMS, to establish environmental and quality goals with measurable indicators. Provide all-round support and ensure the training activities for workers necessary for the implementation of this policy.
